FROM STUDY TO SKILLS:

All academic programs offered at the UM help students develop valuable transferable skills. The goal of Physics is to understand the behavior of matter and energy on every level: from the origins of the universe in the Big Bang to the interior of atoms in your computer screen. In pursuing a degree in Physics, you will learn theoretical and experimental techniques as you study the laws and properties of motion, heat, light, electricity, radiation, magnetism, particles, and matter.

Related fields include Astronomy, Chemistry, Mathematics, and Computer Science.

SKILLS AND ABILITIES

Problem-Solving Skills
Breaking problems into their component parts
Performing calculations
Modeling complex systems mathematically
Data analysis
Reviewing relevant literature
Designing equipment to perform a desired measure
Creating computer simulations

Communication Skills
Summarizing research findings
Writing research proposals
Giving seminars on physics topics
Teaching basic physics ideas
Preparing technical reports
Contributing to project teams
Radio, television and cellular communication

Technical Skills
Metal shop abilities
Equipment design
Electronics design and repair
Cryogenic methods
Computer programming
Medical imaging techniques

Research/Project Development Skills
Reviewing literature
Developing theories
Testing hypotheses
Organizing ideas & materials
Defining/developing/generating ideas
Integrating theoretical approaches

BUILDING YOUR SKILLS OUTSIDE THE CLASSROOM

Employers seek out individuals who can demonstrate excellent verbal and written communication skills, teamwork and interpersonal skills, initiative, and a strong work ethic. Student organizations and campus employment, including research with Physics Department faculty members, offer valuable opportunities to add to the skills you are developing in your classes. Most concentrations sponsor specific student groups like an undergraduate organization or an honor society. Other options include study abroad, off-campus employment or volunteering in the community. Finally, a summer internship may be the best way of all to test out a career field and develop marketable skills.
FROM SKILLS TO CAREER

Students graduating with a Bachelor's degree in Physics are prepared for advanced study in physics or professional school. Many graduates work in related technical and scientific occupations, while others combine their physics expertise with additional skills in such areas as industry, education, medicine and finance.

Problem-Solving Skills
Science advisor
Mathematician =
Flight management analyst
Test engineer
Financial analyst
Attorney/Lawyer =
Physician =

Communication Skills
Science librarian
K-12 teacher
College instructor =
Museum curator
Sales representative
Technical writer

Technical Skills
Cardiac imaging researcher
Technician: laser, accelerator, electronic
Computer specialist
Television engineer
Automotive engineer
Computer systems engineer
Space technician
Satellite data technician
Medical physicist =
Medical device designer
Optometrist =
Meteorologist =

Research/Project Development Skills
Physicist
Research scientist
Laboratory manager
College administrator
National lab researcher
Laboratory technician
Oceanographer =
Astronomer
Hydrologist =

= Green Jobs
= Further Study Required

CONCENTRATION REQUIREMENTS

The Physics concentration is normally declared after prerequisite courses have been completed. Due to the sequential nature of course offerings, students should use the LSA Bulletin or talk with concentration advisors to determine the appropriate course of study. Students interested in physics are urged to contact the Physics Department as soon as possible to discuss placement in a research activity and to get advice about course sequencing and research skill training.

On-campus jobs (work-study and non work-study jobs) are listed at:
studentemployment.umich.edu/JobX_Home.aspx

Connect to Community lists volunteer opportunities in local organizations: connect2community.umich.edu

NEXT STEPS/RESOURCES

To begin connecting to professionals in fields that interest you, create your own LinkedIn account: careercenter.umich.edu/article/getting-started-linkedin

To identify internships or job opportunities, visit Career Center Connector: careercenter.umich.edu/article/c3

Maize Pages list hundreds of organizations for students to get involved in: maizepages.umich.edu
